### Net Integrator Mark I

NET INTEGRATION TECHNOLOGIES INC.

We love it when a low-profile company blindsides us with a killer product.

Case in point: the Net Integrator Mark I. With two externally accessible and removable hard drives and three NICs, this server appliance offers

everything the small organization needs in the way of basic services. It flawlessly combines file and print sharing plus Web and e-mail serving into one device. And to make things simple for the networking novice, the server appliance offers full backup with one push of a button.

The operating system can boot from Flash memory, so if both drives go down your basic operations are still intact, including Internet connectivity. This is just one of the useful features of an outstanding appliance.

Net Integration Technologies Inc. develops high-performance integrated office super servers designed to meet the IT needs of the SMB/SME market. Net Integrator products are delivered through a global network of Partners. For more information, visit [www.net-itech.com](http://www.net-itech.com). Telephone: 905-946-1777 or toll-free at: 866-384-8324.
